

## **IPS 2021 Earlybird registration and abstract submission**

Dear all,

Please note that the early bird registration and abstract submission for the 2021 (virtual) IPS conference will close in less than a month.

The deadline is January the 21-st.

The organizing committee has worked together with the IPS topical Divisions to form sessions that cover most of the physics research conducted in Israel. Special effort and attention has been given to cover also research topics not covered by the Divisions.

The comprehensive list of parallel sessions includes:

### Condensed Matter

- Superconductivity
- Strongly correlated quantum matter
- Physics of layered materials
- Topological phases of matter

### Atomic and Molecular (AMO)

- Quantum Information
- Optics and Photonics
- Cold Atoms and Molecules

### Soft-matter Nonlinear Biological and Statistical Physics

- Soft Matter Physics
- Statistical Physics
- Biological Physics
- Complex Systems and Nonlinear Dynamics

### Particle and High-Energy Physics

- Particle and High-Energy Physics Phenomenology
- Particle and High-Energy Physics Experiment
- Particle and High-Energy Physics Formal Theory
- Nuclear Physics

### Astronomy, Planetary and Space Science

- Astronomy
- Planetary and Space Sciences
- Astrophysics

In addition to the subjects covered by the Divisions as listed above, we have added the following sessions:

- Applied Physics
- Material Physics
- Physics in Industry
- Fluid Dynamics
- Physics Education
- Plasma physics

Please take advantage of this unique opportunity to present your work to Israeli Physics community.

In case your research topic is not covered, please feel free to submit an abstract and if enough abstracts on a topic are submitted we will open up additional sessions.

We are also happy to announce that the conference shall include a poster session in which prizes shall be awarded for outstanding posters.

For registration .

For Abstract submission .

With best regards,

The organizing committee.
